

## DYLON LINGERIE WHITENER

### DIRECTIONS

- Fill a plastic bowl with hot water. Best results are achieved at 60°C (hottest tap water) for 30 minutes or at 40°C left overnight.
- Wearing rubber gloves, empty both sachets into bowl & stir thoroughly.
- Fully submerge items & stir briefly.
- Leave to soak for 30 minutes, stirring occasionally, or overnight.
- Rinse items thoroughly. Wash & dry as usual
- For use on 100% white items only (not cream or partially coloured items).
- Will remove most colour runs from underwear.
- Discolouration caused by direct sunlight or household bleach may not be removed. DYLON Lingerie Whitener may expose this discolouration, but will not have caused it.

One pack treats 5-8 items. For best results use regularly.
