

How to use IMAGE MAKER

- Brush a liberal amount of IMAGE MAKER paste onto your photocopied image and position it on your chosen item or fabric, picture side down.
- Allow to dry, then sponge the back of the photocopy lightly with water and carefully peel away the paper to reveal your image.
- Once all the paper residue is removed, seal your transferred image by applying a final coat of IMAGE MAKER paste.
- When dry the finished transfer is permanent and machine washable.

Tips for using IMAGE MAKER . . .

- For best results use a photocopy of your image. Both black/white and colour photocopies are suitable.
- The Image Maker process reverses your original picture, so select an image without words or numbers. Alternatively, obtain a reverse photocopy of your picture.
- Due to copyright laws, it may be illegal to photocopy certain pictures without permission.
- Refer to reverse of the pack for full instructions, including use on dark fabrics.
