

Dylon Fabric Paint Instructions

1. When working with fabric ensure it is washed and dried before application of paint.
2. Place a protective backing such as card or cloth underneath the area to be decorated.
3. Shake bottle well. Apply paint by using a soft paint brush.
4. Allow to dry at least 4 hours. Always check carefully before ending drying process. We recommend 24 hours for best results.
5. Colour needs to be fixed. Place a clean cloth over the painted area and iron on a hot setting for 1-2 minutes. ensure the fabric you have painted on is able to accept ironing at hot temperatures. Where your design uses colours painted on top of one another ensure you carry out the colour fixing in between coats.
5. Do not wash fabric for at least 72 hours. Do not iron directly onto the design. The fabric will return to its original softness after washing.
